Getting past – or before – data

Sensing Change

Particle Falls

RESEARCH

Particle Falls is a large-scale, real-time visualization of air-quality data.

HighWaterLine

RESEARCH

In HighWaterLine, a performance piece, Eve Mosher traces a chalk line at 10 feet above sea level.

Estuary/Toxi*City

RESEARCH

Estuary/Toxi-City is the work of director and artist Roderick Coover.

Waters: Glaciers and Bucks

RESEARCH

Waters: Glacier and Bucks, 2007–2011, comprises eight photographic prints by Diane Burko.

Calendar of Rain

RESEARCH

Calendar of Rain was a visual record of precipitation at CHF, presented from 2013 to 2014.

Wind Map

RESEARCH

Wind Map makes visible the current wind speeds and patterns across the United States.

Uprooted

Village Green

History. Health. Community.

Ambler, Pennsylvania, is a vibrant commuter town 20 miles from Philadelphia, with an idyllic main street, a close-knit community, and a history intertwined with the legacy of Keasbey and Mattison, a manufacturer of asbestos-containing products.

Discover Ambler's stories and join us in imagining its future.

Inviting Apprehension

Shapiro, Nicholas, Nasser Zakariya, & Jody Roberts. "A Wary Alliance: From Enumerating the Environment to Inviting Apprehension." *Engaging Science, Technology, and Society* [Online], 3 (2017): 575-602.

Grid+Flow

What do we know about water
How do we know it
What do we do know that we know
Who must act
